

1 1/4" HOSE REEL SWIVELS

There are two styles of 1 1/4" hose reel swivels used on the B and SJR series Aquatechs since the early 90s which we refer to as the old style and new style. We started using the new style exclusively for production in late 2001 on rear reel units because of warranty issues caused by users who either failed to grease the old style swivel or over greased them resulting in "blown out" packing seals. On front reel units we still use the old style for the sake of clearance. Please use the information below to determine which swivel your customer has. On rear reel applications, the new style will retrofit the old style but you will also need a part number 132530 1 1/4"NPT close nipple.

OLD STYLE 1 1/4" REEL SWIVEL
PART NO. A130727

Has grease fittings
Machined Steel, shiny finish

Repacking kit: **A130727KIT**

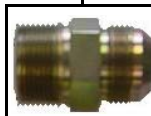

NEW STYLE 1 1/4" REEL SWIVEL
PART NO. A130727-1

Sealed unit
Cast iron, painted red

Repacking kit: **A130727-1-KIT**
Ball Bearing kit: **A130727-1-BB**

See parts bulletin AQPБ-155 for more information on this design.

A130721 - Kit consisting of A130727 and an A130753 1-1/4"MJIC Inlet Adapter

A130753

A130754 - Kit consisting of A130727-1 and an A130753 1-1/4"MJIC Inlet Adapter

NOTE: These are the only 1 1/4" swivels available from us. If you run across another style 1 1/4" swivel on an older Aquatech unit, it is obsolete and would have to be substituted by one of the above.
