**NEW NUMBER ANNOUNCEMENT**  
**A239329-1 Strainer Assembly**

We have introduced part number A239329-1 for those desiring to replace the entire strainer assembly on our standard B-Series machines (units with a Roots RCS/RAM 624 exhauster). In the past, this strainer was only available by the individual components. The advantage of ordering the assembly is reduced installation time (it will even be pre-painted black). Vacuum relief valves are not included - they will have to be transferred from the old strainer or ordered separately.

The strainer assembly consists of one each of the following:

- (Item 1) p/n A246114 Strainer Housing Weldment \*
- (Item 2) p/n A152970 Camlock Hook
- (Item 3) p/n A239235 Inlet Screen
- (Item 4) p/n A190230 Cover Gasket
- (Item 5) p/n A154080 Cast Inlet Screen Cover
- (Item 6) p/n A154090 Spring Bar
- (Item 7) p/n A102700 Cotter Pin

\* A246114 replaces old part number A239290
