

BOOM HOSE ADAPTER

On earlier model Aquatech 8" standard booms, the boom hose clamped directly to the boom hose adapter. Starting in the late 1990s, a quick release design was incorporated making it a much easier task to service the boom hose. The chart below illustrates the difference and calls out the part numbers involved. When ordering parts for a late 90s 8" standard boom, it is best to have the customer check which set-up he has.

ITEM #	PART NUMBER	DESCRIPTION	QTY.
1	A192010	Turret Flange Gasket	1
2	A240940	Old Style Boom Hose Adapter	1
3	A245581	New Style Boom Hose (Female Ring Lock) Adapter	1
4	A220720 *	Banding Type Clamp (<i>banding tool required</i>)	2
5	A191804	8" Ring Lock Seal (<i>rubber</i>)	1
6	A220425	8" Ring Lock Clamp	1
7	A380355	8" Male Ring Lock Coupler	1

* See Parts Bulletin AQP-B-103 for alternate field installable clamp.

NOTE: Besides double clamping the boom hose to item 7, we also drill and use three (3) each of the following: A380352 retaining clips, A380354 carriage bolts, A107210 flat washers, and A107016 lock nuts.
