

# **AQUATECH**

## **PARTS BULLETIN**

The design of the A152964 camlock lever used on various Aquatech portals and doors has change. The picture below compares the two. The older design on the left was discontinued by the manufacturer. The newer design on the right is from another supplier and we have designated it with part number A152964M. Please note that A152964M does not include A152966M round threaded insert (camlock nut). Order part number A152945M for the assembly. Camlock hook part number A152970 remains the same.

**A152945M Camlock Assembly - consists of one each: A152964M and A152966M.**
