

# AQUATECH

## PARTS BULLETIN

There are four generations of the 7-button pendant control used on the B-Series since the early 90s. Functionally there are all the same, however the components will not necessarily interchange. Please use this bulletin to identify what pendant control you are working with for replacement parts. Note: The 35' cable pendant is for all B-Series machines except the B-15 which uses the 45' cable pendant.

	DISCONTINUED STYLES			CURRENT STYLE
Marking on Case	Telemechanique	Giovenzana	AB (Allen Bradley)	None
Approximate Years	up to 2003	2003 to 2007	2007 to 2009	2009 on
w/35' cable & plug	A122070-1 (NLA)	A122070-2 (NLA) AB was a running change		A122170
