

AQUATECH

PARTS BULLETIN

This is an informational bulletin to provide visual identification for adjustable flow control valves used on various Aquatech units. They are used to control the speed of the reel. On B-Series units, the supply to all the hydraulic functions on the rear flow through this valve (this design necessitates returning the valve to wide open position for the dumping operations to operate at full speed).

 <p>KNOB A110271-K</p> <p>A110271 Fits older models</p>	 <p>A110279 (r/b A110282-1) Fits older models</p>
 <p>KNOB A110282-K</p> <p>A110282 Fits older models</p>	 <p>KNOB A380510-2</p> <p>LEVER A380510-1</p> <p>A380510 Current Valve</p>

A110282-1
Consists of 1 p/n A380510 valve and 3 p/n A135184 JIC adapter elbows.
