

AQUATECH PARTS BULLETIN

Aquatech part number A121050 is a high profile, high intensity strobe light that has been used on various units for many years. In early 2005, Grote manufacturing replaced the original 7704 series with a newer 7767 series strobe. However, our engineering department did not assign a new part number when this change occurred. The appearance of both strobes is almost identical, however, the parts are not interchangeable. The older 7704 series came with a clear dust cover; on the 7767 series, the dust cover must be purchased separately as an option. When ordering a replacement part please advise us which strobe the part is for.

Older A121050

Found on older units to circa 2005
Amber Lens: TBA
Flash Tube: A121050-1

Newer A121050

Purchased since May 2005
Amber Lens: A121050-2
Flash Tube: A121050-1NS
